Dear Ms Cheng,

**Producer Responsibility Scheme – Plastic Beverage Containers**

The American Chamber of Commerce is one of the largest international business chambers in Hong Kong, and on behalf of our members, is pleased to be able to respond to this important public consultation exercise.

Back in 2014, the Chamber strongly supported government's longer term plans to both reduce waste and for the extension of landfills and to develop Hong Kong's first waste incinerator. Whilst these latter two developments can help buy time for other measures to work, we do feel it is now time to ramp up efforts to increase the recycling of key 'waste' items and strengthen the circular economy in Hong Kong.

We are therefore supportive of the proposed PRS Scheme and have pleasure in enclosing the View Response Form, duly completed, and trust that the government will continue to bring forward additional measures to facilitate both recycling and a reduction in the overall level of municipal solid waste.

Yours sincerely,

Tara Joseph  
President

Encl.

Q10(a): Do you have any specific suggestion(s) on promoting eco-packaging design?

Government should work closely with businesses in this sector and NGOs to regularly review both design options and in future to review the effectiveness of this PRS scheme.

Q10(b): Do you have any other comments on the PPRS and other plastic-related issues?

Given the imposition of the levy, suppliers may seek to escape the PRS by turning to packaging which is not covered (e.g. laminated/waxed board/paper) but which is even more difficult to recycle. The scheme design and implementation needs to watch out for this and help prevent it.
